Biography

**Stefania Macchia**
(Istat, Italy)
macchia@istat.it

Stefania Macchia, head researcher working in Istat since 1986.
Expert of data collection in statistical surveys, she coordinated the unit “Methodologies and techniques for computer assisted data collection and automatic coding” in the Statistical Methodologies and IT Department until 2013. Later she was head of a project aimed at the harmonization of questionnaires of business surveys. Now she works in the Istat Data Collection directorate, coordinating all the activities concerning the design of questionnaires and the management of metadata and classifications pertaining to the data collection phase.
