

Business statistics in the CSO of Poland

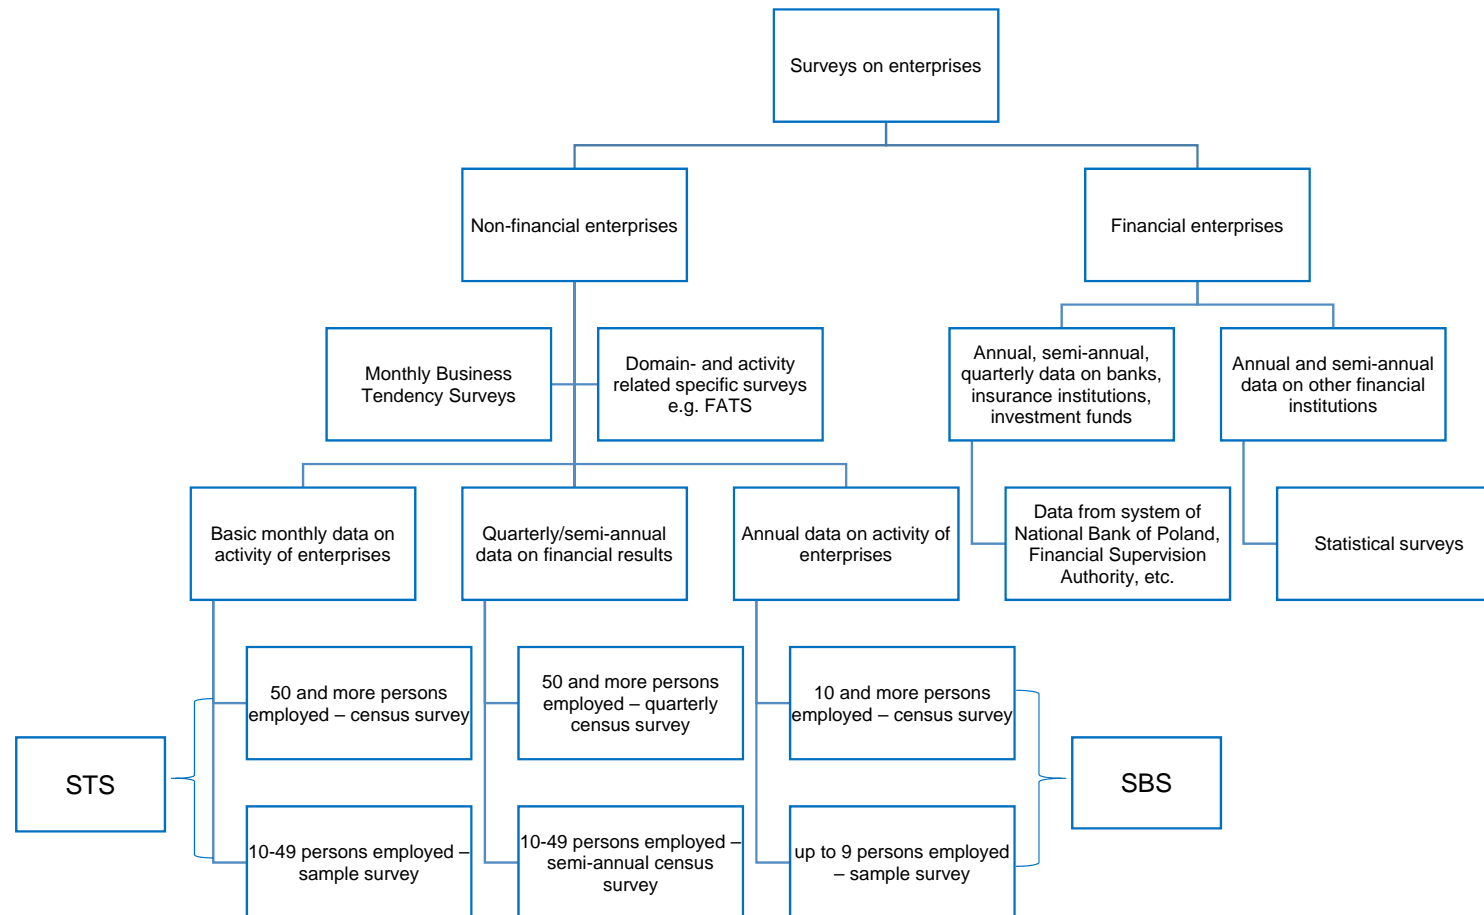

EESW 2015 Workshop in Poznań

7-9 September 2015

Katarzyna Walkowska, Aneta Płatek

Central Statistical Office of Poland, Enterprises Department

Business surveys

Statistical business register

- One identification number
- Sources of updating:
 - ✓ National Official Register of National Economy Entities (REGON)
 - ✓ administrative data
 - ✓ survey results
- Common basis for business surveys

Collection of data from non-financial enterprises

- Reporting portal – personalized electronic questionnaires
- Integration of forms → modules

(structural information, financial data, investments, foreign affiliates)

- Scope of data collected depends i.a. on:
 - ✓ size of the unit
 - ✓ kind of activity
 - ✓ type of books kept
- Validations

Survey on micro enterprises

- Sample survey – 4%
- Assumption – one activity and one localisation
- Stratification of sample
- Use of administrative data – validation
- Results used by SBS and other surveys including national accounts – basic information on structure, employment, financial results, investments

Modification of survey on micro enterprises

- Integration with the survey on newly created entities
 - ✓ change of sampling
 - ✓ reduction of collected data
 - ✓ increase of obtained information
- Methodological work on imputation of data with the use of administrative data

Thank you for your attention
