

A DIFFERENT ANGLE

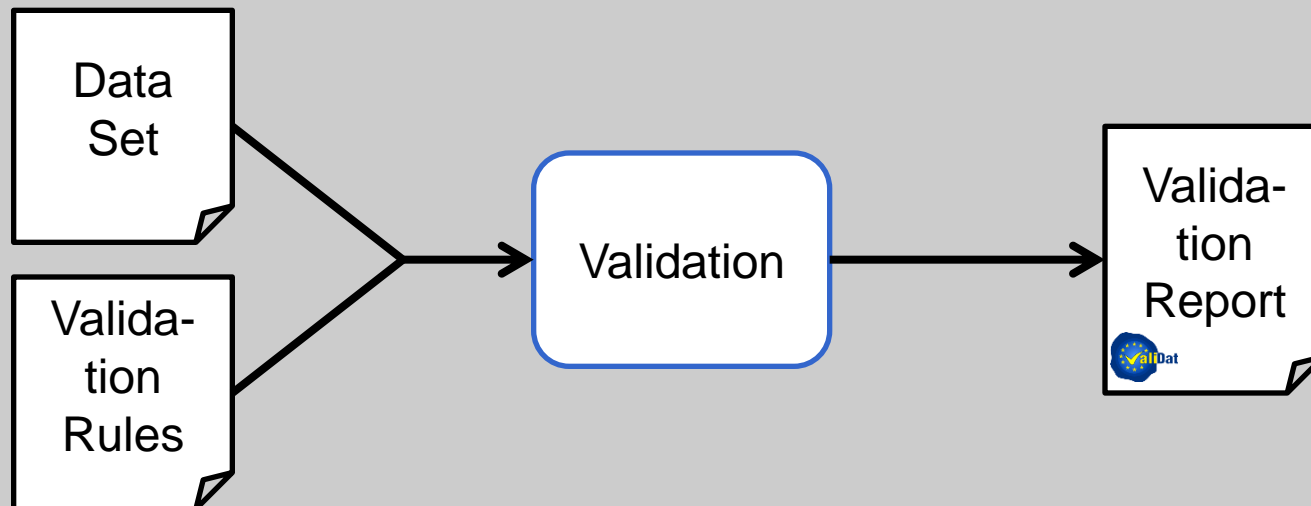

Validation as a Business Case for CSPA/SERV

Joint UNECE/Eurostat Workshop on Implementing CSPA

‘CSPA for Digital Transformation’

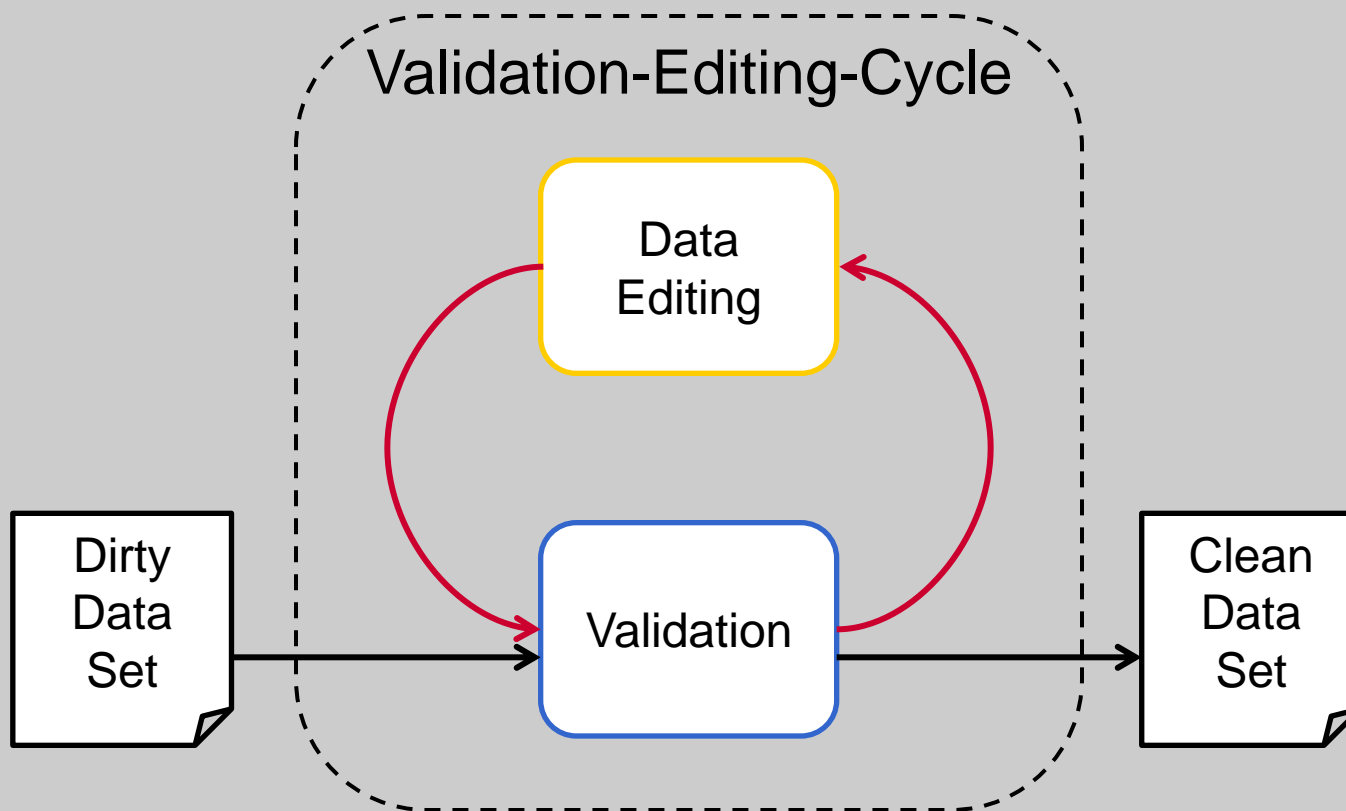

Wiesbaden, 04.07.2017

What is data validation?

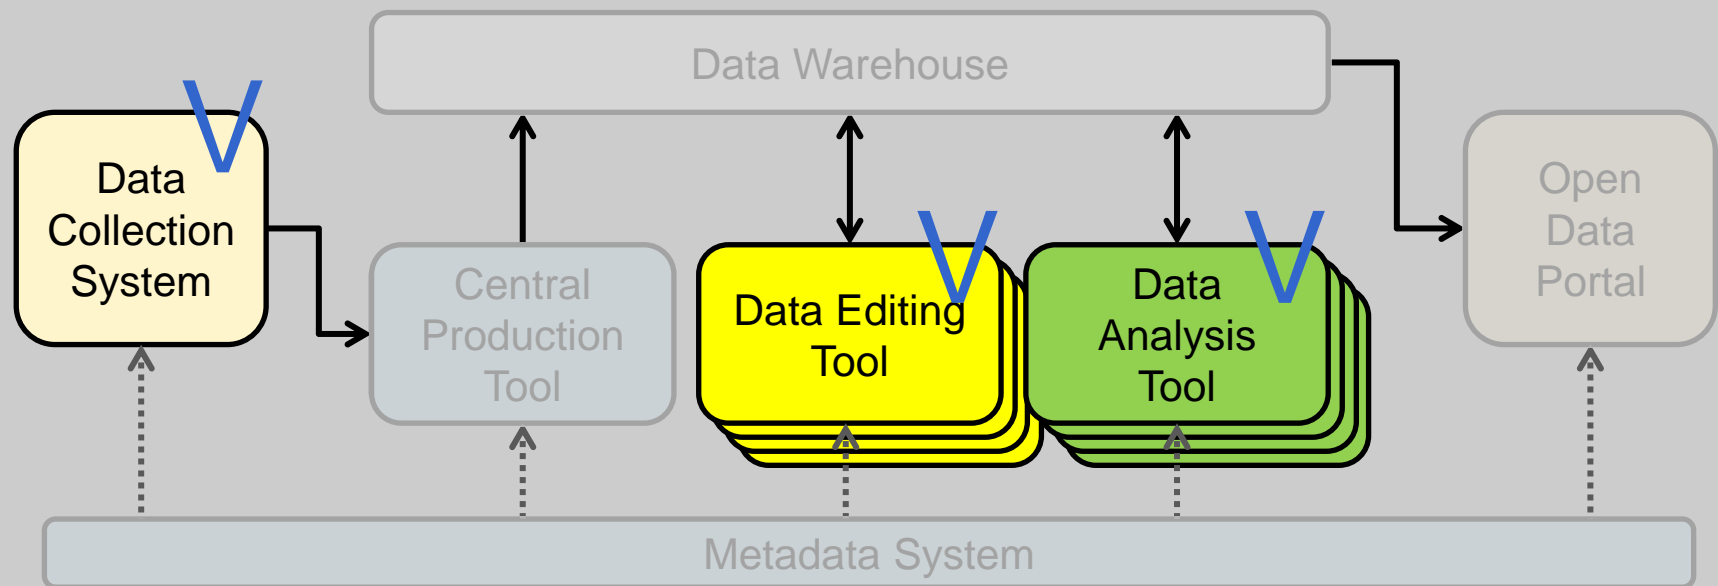

Validation report is not yet a LIM object.

Why is data validation important?

An architecture example

- Most validation routines are very similar.
- Why not pull validation out of different systems and build services?

What could validation services do?

Validation

Transfor-
mation

- by validation level
- for specific reference material
- domain-specific services
- of data structures
- of validation rules

Any ideas on integration?

Why CSPA? International cooperation!

Something a little more concrete?

- Validation services: Presentation by Eurostat
- Integration of services: Presentation by Portugal
