Option 1 with adjustments:

- Change colors of data points to show statistical significance of data values
- Ranking in order of magnitude
- Flip chart so text is not slanted
- Shorter title
- Data source added
- Legend added
- Axis title added

Talking points:

- The dots represent the over the month changes, which are in the middle of the grey bars that show the confidence intervals.
  - If the grey bar does not cross the zero line the over the month change is statistically significant, as represented by a blue dot
  - If the grey bar crosses the zero line, the over the month change is not statistically significant, as represented by an orange dot
- 1st bullet point remains
