The European Network for Better Establishment Statistics (ENBES) is inviting academics, methodologists and users to participate in the workshop on

## Coordinated Sampling for Business Surveys

Date: Friday, 1st March 2019, 9:00 - 16:30

Venue: Statistics Netherlands (CBS), The Hague, The Netherlands

National Statistical Institutes publish each year a number of different business statistics. In practice, a considerable part of these statistics is based on surveys, whose samples are repeatedly drawn from a central business register that acts as a sampling frame.

Sample surveys cause response burden for businesses. To regulate this administrative burden, a sampling coordination system may be used. The purpose of sampling coordination is to control the overlap between successively drawn samples in a dynamic population. In the case of negative coordination this overlap is minimized and in the case of positive coordination maximized. In this way one can regulate the duration that a business receives a certain survey, the period that they are free of surveys or whether a business receives multiple surveys or not.

The workshop aims to provide deeper insight into the current most advanced methods of coordinated sampling for business surveys. Broadening the range of approaches, the moderated workshop will identify their common elements and also their differences, creating a platform for exchanges about ways to further improve the existing methodology and the related metrics. Additionally, in the workshop software will be presented that can be used for sampling coordination.

In order to stimulate the discussion during the workshop, ENBES will prepare a short note with discussion points on coordinated sampling, that will be circulated among the participants in advance of the workshop.

On behalf of ENBES

Arnout van Delden, Marc Smeets, Paul Smith

Registration To register, please find a link to the registration form on the workshop web page:

https://statswiki.unece.org/display/ENBES/Workshop+on+Coordinated+Sampling

Registration is open until 1st February 2019. The number of participants is limited to 50 in order to maintain the workshop character of the event. Registrations are admitted on a first-come, first-served basis. Registrations will only be valid after confirmation by ENBES.

Details No registration fee is requested for participation. Presentations and discussions will be in

English. ENBES is not able to give any financial assistance for travel or accommodation costs. Further information on the workshop, including logistical information, will be provided subsequently on the workshop website. Please contact <a href="mailto:info@enbes.org">info@enbes.org</a> for further questions.

## **Preliminary programme**

08:30 - 09:00	Registration, with coffee and tea
09:00 - 09:10	Introduction, welcome and overview  Arnout van Delden, Marc Smeets (Statistics Netherlands),  Paul Smith (University of Southampton, ENBES)
09:10 - 09:55	Coordinated sampling: the current state and the research frontier Alina Matei (Université de Neuchâtel)
09:55 - 10:40	Coordinated sampling: Theory, method and application at INSEE  Caroline Imberti (National Institute of Statistics and Economic Studies, France)
10:40 - 11:00	Coffee break
11:00 - 11:45	Coordinated sampling: Theory, method and application at Statistics Sweden Annika Lindblom (Statistics Sweden)
11:45 - 12:30	Discussion of the morning session  Moderator: Paul Smith (University of Southampton)
12:30 - 13:15	Lunch
13:15 - 14:00	Coordinated sampling: Theory, method and application at SFSO  Lionel Qualité (Swiss Federal Statistical Office)
14:00 - 14:45	Coordinated sampling: Theory, method and application at CBS Marc Smeets (Statistics Netherlands)
14:45 - 15:00	Coffee break
15:00 - 15:45	Optional: Short presentations of other approaches and experiences
15:45 - 16:30	Discussion of the afternoon session and reflections from the day Moderator: Paul Smith (University of Southampton)
