Input Privacy-Preservation Techniques Project

Proposal for extension of the Project

Workshop on the Modernisation of Official Statistics
15-16 November 2021

Input Privacy Preserving Technique project

Achievements:

- Framework to describe IPPT use cases
- In collaboration described and realized two prototypes
- Base for public consultation

Why Continuation of the project

Need to continue collaboration:

- Deepening the performed experiments (still a lot to learn)
- Better understanding Environment needed for IPPT
- Need at UN task team for practical examples
- Better understanding for the methodological challenges

Expected Benefits

- Brings long-term goals of HLG-MOS closer
- Opportunities for new statistics
- Next level of knowledge and experience what it takes to access resources that are hitherto inaccessible due to privacy rules.

Q & A
