

Table 1. The 2008 SNA Implementation Plan Components: Country: KAZAKHSTAN

	Status 2012 ¹	Main problems and planned activities in 2012	Progress made since 2012	Outstanding problems and future activities	Need for TA, training, guidelines	Planned timeframe
STAGE 1 - Review of national or regional statistical strategic papers to include there the 2008 SNA implementation						
Identification of and consultation with the main stakeholders for the 2008 SNA implementation. Institutional agreements.	In the process of understanding the need for cooperation	Definition of state agencies, which establish a unified system of statistics <u>Activities:</u> Conclusion of agreements on cooperation within the framework of Working groups on implementation of new and improvements of existing SNA indicators.			Coordination is needed, cooperation with the Office of the Prime Minister of the Republic of Kazakhstan	Continuously
Prioritization for 2008 SNA, based on user needs and resources.	In the process of implementation within the framework of the Strategic Plan of the Agency of the Republic of Kazakhstan on Statistics	Definition of user needs of statistical information <u>Activities:</u> - Activation of work of the Interagency Council on State Statistics - Definition of user requirements for statistical information			Need for training for users of statistical information	Continuously
Inclusion of the implementation of the 2008 SNA in the overall strategic plan of the statistical office	In the process of implementation within the framework of the Strategic Plan of the Agency of the Republic of Kazakhstan on Statistics	Performing activities listed in paragraph b of the Strategic Plan of the Agency of the Republic of Kazakhstan on Statistics for 2011-2015 <u>Activities:</u> - Meetings of the Working Groups on statistics by industry - Discussion of problematic issues with the leadership of the Agency of the Republic of Kazakhstan on Statistics	Implementation of the 2008 SNA is one of the objectives of the Strategic Plan of the Agency of the Republic of Kazakhstan on Statistics for 2011-2015 (approved by a decree of the Government of the Republic of Kazakhstan dated December 31, 2010 № 1498). <u>Note:</u> The Government of the Republic of Kazakhstan made the following amendments to the Strategic Plan: №370 (05.04.2011); № 1477 (06.12.2011); №1666 (30.12.2011); №1745 (29.12.2012, effective from 01.01.2013); №850 (26.08.2013).		Need for understanding and support from the leadership in the process of including the priorities of 2008 SNA implementation into Strategic and Operational plans of the Agency of the Republic of Kazakhstan on Statistics, given the availability of human resources	2011-2015
				<u>Future events:</u> - Meetings of the Working Groups; - Clarification of the timing of the implementation of the Working Plan of the Department of National Accounts so that it conforms to the Action Plan for the KAZSTAT project "Strengthening the National Statistical System of the Republic of Kazakhstan for the period 2012-2016 "		During the time allocated for the KAZSTAT project
Adoption of detailed action plan for 2008 SNA.	In the process of implementing the instructions of the Agency of the Republic of Kazakhstan on Statistics	In 2010 a plan of joint activities on System of National Accounts (SNA) implementation priorities for 2010-2012 was developed. In 2011, a 2008 SNA implementation Plan for 2011-2014 was developed <u>Problems:</u> - Lack of sufficiently qualified personnel to meet the objectives and plans - Lack of understanding of the importance of SNA implementation by public authorities as well as statisticians <u>Activities:</u> - Necessary to solve problems associated with lack of information base for SNA - Necessary to carry out activities to improve and optimize the statistical system	In 2012, the 2008 SNA implementation Plan for 2011-2014 was revised. The New Plan - the Action Plan for 2008 SNA implementation for 2012-2015 - was approved by order of the Chairman № 133 dated June 6, 2012.	<u>Future events:</u> Necessary to conduct an update of the Action Plan for 2008 SNA implementation for 2012-2015, in order to meet the needs of integrated economic statistics.	- Necessary to study the experience of countries with highly developed statistical systems - Necessary to implement the recommendations on statistics of international organizations (UN, UNECE, IMF, World Bank, etc.) - Collaboration with government agencies within the system of statistics - Necessary to introduce modern software tools and systems for the collection, processing, storage, transmission, and editing of data - It is necessary to study the "Guidelines for integrated economic statistics" (UN, 2013). - Need for expert advice on best practices in developing an integrated approach to achieve coherence and	Next 5-7 years

¹ Not available yet, discussed, planned, on going, finished, etc.

	Status 2012 ¹	Main problems and planned activities in 2012	Progress made since 2012	Outstanding problems and future activities	Need for TA, training, guidelines	Planned timeframe
					consistency of economic statistics in order to improve their quality and analytical value.	
STAGE 2 - Review of work needed to support implementation of the 2008 SNA						
Adoption of new classifications and other improvements in business registers and business statistics	In the process of planning	Development, implementation and update of classifications necessary for 2008 SNA implementation <u>Activities:</u> - Development of classifications necessary for 2008 SNA implementation	In 2012-2013, as part of the Action Plan for 2008 SNA implementation for 2012-2015, the following classifications were newly developed and updated: - Classification of financial assets (CFA); - Classification of non-financial assets (CNA); - Classification of the functions of government (COFOG); - Classification of the purposes of non-profit institutions serving households (COPNI); - Classification of institutional sectors (CIS); - Classification of individual consumption by purpose (COICOP).		- Need advice of international experts in the organization of business register that meets the requirements of the SNA - Need advice of international experts in the creation of business statistics, meeting the requirements of SNA	2012
				<u>Future events:</u> - Update of classification of forms of property (CFS) is planned; - Development of Classification of Institutional Units by Sector (CIUS)		2014-2015
Changes in business statistics surveys and questionnaires to collect the necessary source data	In the process of planning	Analysis of available data sources in the Agency of the Republic of Kazakhstan on Statistics and determining the need for changes and additions to surveys and statistical forms <u>Activities:</u> Development of requirements for industrial and structural statistics data reporting format necessary for SNA purposes			Need for expert help from international organizations and national statistical offices to determine whether information flows conform to SNA requirements	2012-2014
Changes in other related source statistics compiled by the statistical office						
Review of related macroeconomic data sets compiled outside the statistical office (e.g. BoP, GFS, MFS)			Until 2013, the formation of external sector statistics of Kazakhstan was carried out in accordance with the International Monetary Fund's Balance of Payments Manual, 5th edition 1993 (BPM5). Starting from the 1st quarter of 2013, the National Bank, in order to ensure compliance with new international standards, has carried out the transition to compilation of external transactions statistics in accordance with new methodology of the IMF - Balance of payments and the international investment position manual, 6th Edition 2009 (BPM6).	<u>Future events:</u> Necessary to recalculate all the SNA indicators using data from the National Bank.		2014-2015
Adaptation of administrative data sources to new requirements	In the process of planning	Analysis of available administrative data sources and determining the need for changes and additions to surveys and statistical forms <u>Activities:</u> Development of requirements for administrative data sources in data	In 2013, through the development of an integrated information system "e-statistics", cooperation with administrative data sources and integration of information systems of a number of government agencies took place.		Need for expert help from international organizations and national statistical offices to determine whether information flows conform to SNA requirements	2012-2014
				<u>Future events:</u> Necessary to update the Action Plan	Necessary to study the "Guidelines on integrated economic statistics"	2014-2015

	Status 2012 ¹	Main problems and planned activities in 2012	Progress made since 2012	Outstanding problems and future activities	Need for TA, training, guidelines	Planned timeframe
		reporting format necessary for SNA purposes		for 2008 SNA implementation for 2012-2015 in order to include activities on macroeconomic calculations using administrative data sources.	(UN, 2013), regarding the use of administrative data sources.	
IT and other changes. Staff resources.	In the process of planning and development	The use of modern IT for statistical purposes <u>Activities:</u> - Need of activities to improve and optimize the statistical system - Further development of IT for statistical purposes under the "e-statistics" project	In 2013, through improvement of statistical tools, a number of statistical survey forms were converted to electronic forms for the integrated information system "e-statistics" in order to reduce the response burden. Integration with information systems of other state agencies to exchange data.		Need for training in Agency of the Republic of Kazakhstan on Statistics on the use of modern IT	Continuously

STAGE 3 - Development of National Accounts and changeover to the 2008 SNA

Main priorities for SNA implementation

Outstanding issues from the 1993 SNA: The following accounts and balances are not compiled: - Other changes in volume of assets - Revaluation account - Balance sheets of assets - Social accounting matrices - System of Environmental-Economic Accounting	Stage of experimental calculations in accordance with the available information	<u>Activities:</u> - Study methodology of accounts and balance sheets - Analysis completeness and adequacy of existing data sources on SNA purposes - Development of guidelines on provision of necessary data generated by public authorities, and industry and structural statistics, in case of insufficiency and incompleteness - Preparation of worksheets and conducting experimental calculations - Implementation of calculations in practice	Need for technical assistance from countries that already formed these accounts and balance sheets, as well as other components in framework of the SNA.	2013-2014 and later	The following accounts and balances are not compiled: - Other changes in volume of assets - Revaluation account - Balance sheet of assets - Social accounting matrices - System of Environmental-Economic Accounting	Stage of experimental calculations in accordance with the available information
New issues arising from the 2008 SNA: CISSTAT prepared "Overview of the revised 1993 SNA (2008 SNA) and proposals for its step-by-step use in statistics of CIS countries". The document was presented at a meeting of experts from the CIS countries on SNA on December 3-5, 2008 in Moscow. In accordance with this overview, 2008 SNA changes were split in the following groups: - changes affecting the size, structure and growth rate of GDP; - changes affecting the other major figures in the accounts, compiled by CIS countries; - changes relating to the figures in the accounts that are not compiled by CIS countries; - changes that are not relevant to CIS countries due to non-existence of	The following methodological work has been developed: - Methodology of accounting output of central bank - Methodology of accounting financial services - Methodology of accounting insurance services - Methodology of accounting financial intermediation services	In 2011, a Working Group was established to work on methodological issues of national accounts and the financial sector, including specialists from government agencies (National Bank, Agency for Regulation and Supervision of Financial Markets and Financial Organizations, Ministry of Finance, Ministry of Economic Development and Trade) and associations (Association of Financiers of Kazakhstan, Kazakhstan Association of Banks). In the process: Current practices for calculating indicators of the financial sector were discussed, along with methodological approaches in accordance with the 2008 SNA.	CISSTAT has prepared "Guidelines on the calculation of output and use of financial intermediation services, indirectly measured, in accordance with the methodology of 2008 SNA" and distributed it to CIS countries at the end of 2010. They were used for preparing the methodology of accounting financial intermediation services.	<u>Future events:</u> - CISSTAT is planning to develop "Guidelines for the application of the 2008 SNA - interpretation of insurance calculations (except for life insurance)". - Within project "Strengthening the National Statistical System of the Republic of Kazakhstan for the period 2012-2016", KAZSTAT is expecting to receive advice from experts of the Consortium and clarify "Methodology of accounting insurance services", prepared in 2011.		2015
		Planned to expand the number of members in the Working Group on methodological issues of national accounts and the financial sector, in 2014 (was established in 2011). Issues to reflect will include consideration of government sector indicators in terms of accounting military and R&D expenditure; and in terms of consolidated financial statements of State budget, State Social Insurance Fund and National Fund etc.	KAZSTAT project "Strengthening the National Statistical System of the Republic of Kazakhstan for the period 2012-2016" has been started together with the World Bank	<u>Future events:</u> - In 2012, CISSTAT prepared "Methodological guidance on the interpretation of central bank output". These recommendations are to be used by the Department of National Accounts when adjusting the "Methods of accounting central bank output", which was prepared in 2011. - Within project "Strengthening the National Statistical System of the Republic of Kazakhstan for the		2014-2015

	Status 2012 ¹	Main problems and planned activities in 2012	Progress made since 2012	Outstanding problems and future activities	Need for TA, training, guidelines	Planned timeframe
<p>certain phenomena; - changes in terminology, definitions and classifications.</p> <p>Accordingly, Agency of the Republic of Kazakhstan on Statistics, has implemented those changes affecting the size, structure and growth rate of GDP.</p>				<p>period 2012-2016 ", KAZSTAT is expecting to receive advice from experts of the Consortium on: output of the central bank; output of second tier banks; output of insurance services; output of financial intermediation services.</p>		
	<p>The following methodological work is planned: - Methodology of accounting pension fund output - Methodology of calculating GVA for financial activities at constant prices</p>	<p><u>Activities:</u> - Study of the 2008 SNA methodology - Establishment of a Working Group on methodological issues of national accounts statistics with participation of interested government agencies - Discussion, with members of the Working Group, of problematic methodological issues on compilation of SNA indicators, in accordance with the transition to 2008 SNA methodology.</p>			<p>- Need for expert advice from international organizations - Cooperation within the framework of bilateral agreements between statistical offices - Need for translation of all manuals of international organizations into Russian</p>	2012
	<p>The following methodological work is planned: - Methodology of calculating rentals on dwellings - Methodology of calculating market and non-market output by industry - Methodology of calculating output for own final consumption</p>	<p><u>Activities:</u> - Study of the 2008 SNA methodology - Establishment of a Working Group on methodological issues of national accounts statistics with participation of interested government agencies - Discussion, with members of the Working Group, of problematic methodological issues on compilation of SNA indicators, in accordance with the transition to 2008 SNA methodology.</p>			<p>- Need for expert advice from international organizations - Cooperation within the framework of bilateral agreements between statistical offices - Need for translation of all manuals of international organizations into Russian</p>	2013
	<p>The following methodological work is planned: - Methodology of recording R&D activities - Methodology of recording military expenditure</p>	<p><u>Activities:</u> - Study of the 2008 SNA methodology - Establishment of a Working Group on methodological issues of national accounts statistics with participation of interested government agencies - Discussion, with members of the Working Group, of problematic methodological issues on compilation of SNA indicators, in accordance with the transition to 2008 SNA methodology.</p>			<p>- Need for expert advice from international organizations - Cooperation within the framework of bilateral agreements between statistical offices - Need for translation of all manuals of international organizations into Russian</p>	2014
	<p>The following methodological work is planned: - Methodology of accounting informal sector</p>	<p><u>Activities:</u> - Study of the 2008 SNA methodology - Establishment of a Working Group on methodological issues of national accounts statistics with participation of interested government agencies - Discussion, with members of the Working Group, of problematic methodological issues on compilation of SNA indicators, in accordance with the transition to 2008 SNA methodology.</p>			<p>- Need for expert advice from international organizations - Cooperation within the framework of bilateral agreements between statistical offices - Need for translation of all manuals of international organizations into Russian</p>	2014

	Status 2012 ¹	Main problems and planned activities in 2012	Progress made since 2012	Outstanding problems and future activities	Need for TA, training, guidelines	Planned timeframe
Main issues affecting GDP						
i. Calculating pension fund services output	Methodology is under study and experimental calculations are being prepared	<u>Activities:</u> - Study of the 2008 SNA methodology - Discussion, with members of the Working Group, of problematic methodological issues on compilation of SNA indicators, in accordance with the transition to 2008 SNA methodology.	In 2012, Department of national accounts developed "Methodology of accounting pension fund services output". Data sources, used for calculations, were approved by members of the Working group on methodological issues of national accounts and financial sector statistics		- Need for expert advice from international organizations. - Need for technical assistance from international organizations	2012
				<u>Future events:</u> - Within project "Strengthening the National Statistical System of the Republic of Kazakhstan for the period 2012-2016", KAZSTAT plans to verify calculations and receive advice from experts of the Consortium consistent with international practices - Planned to revise "Methodology of the accounting of pension fund services", taking into account received recommendations.	- It would be desirable to have Russian versions of manuals, developed by international organizations, for example, Handbook of National Accounting - Financial Production, Flows and Stocks in the System of National Accounts.	2014
ii. Assessing rentals on dwellings	Methodology is under study and experimental calculations are being prepared	<u>Activities:</u> - Study of the 2008 SNA methodology - Discussion, with members of the Working Group, of problematic methodological issues on compilation of SNA indicators, in accordance with the transition to 2008 SNA methodology.	- Department of National Accounts has studied "Methodological approaches to the estimation of housing services produced and consumed by the owners of property in the SNA," prepared in 2012 by Russian Federal State Statistics Service.		- Need for expert advice from international organizations. - Need for technical assistance from international organizations	2013
				<u>Future events:</u> - Within implementation of the project "Strengthening the National Statistical System of the Republic of Kazakhstan for the period 2012-2016", KAZSTAT plans to verify calculations and receive advice from experts of the Consortium consistent with international practices - Department of Statistics plans to develop price indices for the housing market, which are needed for assessing rentals on dwellings - In the future it is planned to revise the "Method of assessing rentals on dwellings" in light of the recommendations.		2015
iii. Calculating market and non-market output by industry	Methodology is under study and experimental calculations are being prepared	<u>Activities:</u> - Study of the 2008 SNA methodology - Discussion, with members of the Working Group, of problematic methodological issues on compilation of SNA indicators, in accordance with the transition to 2008 SNA methodology.	- In 2013, a draft of "Methods of calculating market and non-market output by industry" was prepared. It requires some improvements in cooperation with departments by industry.		- Need for expert advice from international organizations. - Need for technical assistance from international organizations	2013
				<u>Future events:</u> - Within implementation of the project "Strengthening the National Statistical System of the Republic of Kazakhstan for the period 2012-2016", KAZSTAT plans to verify the calculations and receive advice from experts of the Consortium on calculating market and non-market output by industry, consistent with international practices. - In the future it is planned to revise the "Method of calculating market and non-market output by industry" in light of the recommendations.		2015

	Status 2012 ¹	Main problems and planned activities in 2012	Progress made since 2012	Outstanding problems and future activities	Need for TA, training, guidelines	Planned timeframe
iv. Calculating R&D expenditure	Methodology is under study and experimental calculations are being prepared	<u>Activities:</u> - Study of the 2008 SNA methodology - Discussion, with members of the Working Group, of problematic methodological issues on compilation of SNA indicators, in accordance with the transition to 2008 SNA methodology.	- In 2013, the CISSTAT prepared "Methodological recommendations on formation of the capital account in terms of research and development in accordance with the 2008 SNA". These recommendations are to be used by the Department of national accounts during experimental calculations and preparation of "Methodology of accounting R&D expenditure."	<u>Future events:</u> - As part of the statistical survey forms revision, it is planned to introduce additional indicators in the relevant forms. - Within work of the Working Group on improvement of science and innovation statistics, methodological approaches for calculating R&D expenditure will be discussed - Within implementation of the project "Strengthening the National Statistical System of the Republic of Kazakhstan for the period 2012-2016", KAZSTAT plans to verify the calculations and receive advice from experts of the Consortium - In 2014, development of "Methodology of accounting R&D expenditure" is planned - In the future it is planned to reflect R&D expenditure in accordance with the 2008 SNA.	- Need for expert advice from international organizations. - Need for technical assistance from international organizations - It would be desirable to have Russian versions of manuals, developed by international organizations, for example, Manual on Measuring Research and Development in ESA 2010 (Eurostat) - Manual on the Measurement of research and development activities in the ESA 2010 (Eurostat)	2014
v. Calculating military expenditure	Methodology is under study and experimental calculations are being prepared	<u>Activities:</u> - Study of the 2008 SNA methodology - Discussion, with members of the Working Group, of problematic methodological issues on compilation of SNA indicators, in accordance with the transition to 2008 SNA methodology.	- In 2013, the CISSTAT prepared "Methodological recommendations on formation of the capital account in terms of military expenditure in accordance with the 2008 SNA." These recommendations are to be used by the Department of national accounts during experimental calculations and preparation of "Methodology of accounting military expenditure."	<u>Future events:</u> - Working group on methodological issues of national accounts and financial sector statistics, methodological approaches for calculating military expenditure will be discussed - Within implementation of the project "Strengthening the National Statistical System of the Republic of Kazakhstan for the period 2012-2016", KAZSTAT plans to verify the calculations and receive advice from experts of the Consortium - In 2014, development of "Method of accounting military expenditure" is planned - In the future it is planned to reflect Military expenditure in accordance with the 2008 SNA.	- Need for expert advice from international organizations. - Need for technical assistance from international organizations	2014-2015
vi. Improvement of the informal sector	Methodology is under study and experimental calculations are being prepared	<u>Activities:</u> - Study of the 2008 SNA methodology - Discussion, with members of the Working Group, of problematic methodological issues on compilation of SNA indicators, in accordance with the transition to 2008 SNA methodology.	In 2013, under the "Strengthening the National Statistical System of the Republic of Kazakhstan for 2012-2016 period" KAZSTAT project, Department of national accounts verified estimates of informal activities.	<u>Future events:</u> Within implementation of the project "Strengthening the National Statistical System of the Republic of Kazakhstan for the period 2012-2016", KAZSTAT plans to verify unobserved economy accounting in informal activities in cooperation with the Consortium experts.	- Need for expert advice from international organizations. - Need for technical assistance from international organizations - It would be desirable to have Russian versions of manuals, developed by international organizations.	2014-2015
vii. Implementing illegal activities calculations	Analysis of experimental calculation results performed on the data for the years	<u>Activities:</u> - Study of the 2008 SNA methodology - Discussion with members of the Working Group on improving unob-	In 2013, within implementation of the KAZSTAT project "Strengthening the National Statistical System of the Republic of Kazakhstan for	<u>Future events:</u> - Within implementation of KAZSTAT project "Strengthening the National Statistical System of the		2014-2015

	Status 2012 ¹	Main problems and planned activities in 2012	Progress made since 2012	Outstanding problems and future activities	Need for TA, training, guidelines	Planned timeframe
	2008-2012	served economy calculations, including definition of illegal activities based on SNA concepts, and definition of information sources and methods of estimating illegal activities	the period 2012-2016", Department of national accounts carried out experimental calculations for the following illegal activities: production and distribution of illegal goods (production and distribution of drugs); production of illegal services (prostitution); production of legal goods and services without a special permit (production of alcohol); production and sale of fake products and unauthorized copies of originals; poaching (illegal timber felling, illegal hunting, illegal fishing); smuggling.	Republic of Kazakhstan for the period 2012-2016" is planned to refine the calculations of the non-observed economy in illegal activities, together with the Consortium experts. - In 2014, is planned to develop "Methodology for assessing the volume of illegal activities", taking into account the recommendations of Consortium' experts and agreeing with the Working Group on improving the calculation of the NOE. - It is planned, in 2015, to develop a "Methodology of NOE by economic activity," including estimates of the shadow, informal and illegal activities. - Later is planned to include the adjustments for illegal activities in the calculation of GDP.		
GNI and other primary indicators						
For the rest of the world - the external accounts of the primary income and current transfers, capital account and financial account (BPM 6)	At the planning stage with the National Bank of the Republic of Kazakhstan	Refinement of the methodology of calculating accounts "rest of the world" <u>Activities:</u> - The study methodology of the 2008 SNA - Harmonisation of indicators of the 2008 SNA and BPM6	- Starting from the 1st quarter of 2013, in order to comply with new international standards, the National Bank of the Republic of Kazakhstan has made the transition to the compilation of foreign trade statistics by the new methodology of the IMF – Balance of Payments Manual and the international investment position, 6th Edition, 2009 (BPM6).	<u>Future events:</u> - Department of National Accounts plans to work on the recalculation of SNA indicators in accordance to the revised data for external economic statistics by BPM6. - Within implementation of KAZ-STAT project "Strengthening the National Statistical System of the Republic of Kazakhstan for the period 2012-2016" planned to refine the calculations of SNA indicators together with experts from the Consortium.	- Need for expert advice from international organizations. - Necessary to further cooperate with the National Bank in the framework of the Working Group - Necessary to further cooperate with the National Bank in the framework of the Working Group on methodological issues of national accounts and the financial sector	2015-2016

Accounts by institutional sector (non-financial accounts)						
For all institutional sectors - Manufacturing Account	Underway in the framework of the Plan for the implementation of the 2008 SNA for 2011-2014	Refinement methodology formation accounts indicators of production, generation of income, allocation of primary income, secondary distribution of income, the use of disposable income, capital transactions by institutional sector for institutional sectors and economic activities <u>Activities:</u> - The study methodology of the 2008 SNA - Calculations account indicators in accordance with the methodology of the 2008 SNA			- Need for expert advice from international organizations. - Necessary to further cooperate with the National Bank, Ministry of Finance and Ministry of Economic Development and Trade at the meetings of the Working Group - Necessary to further cooperate with government stakeholders at the meetings of the Working Group, as well as within the project KAZ-STAT "Strengthening the National Statistical System of the Republic of Kazakhstan for 2012-2016 years"	Continuously
Institutional sector accounts: Financial Account						
For all institutional sectors - Financial Account	Underway in the framework of the Plan for the implementation of the 2008 SNA for 2011-2014	Refinement of the methodology of formation of indicators of financial accounts by institutional sector <u>Activities:</u> - The study methodology of the 2008 SNA - Calculations account indicators in accordance with the methodology of the 2008 SNA	In 2013, under the project KAZ-STAT "Strengthening the National Statistical System of the Republic of Kazakhstan for the period 2012-2016", Department of National Accounts received expert advice in form of consultation and study visit.		- Need expert advice of international organizations - Necessary to further cooperate with the National Bank, Ministry of Finance and Ministry of Economic Development and Trade at the meetings of the Working Group	Continuously
				<u>Future events:</u> - National Bank should be revised deadlines for reporting on the financial operations of the National Bank, the second-tier banks, other financial institutions, as well as reporting for the rest of the world. - Ministry of Finance must report on an accrual basis.	- Necessary to further cooperate with government stakeholders at the meetings of the Working Group, as well as within the project KAZ-STAT "Strengthening the National Statistical System of the Republic of Kazakhstan for 2012-2016 years"	2014-2016
Institutional sector accounts: Balance Sheet						
For all institutional sectors - Other changes in assets, Balance Sheet	Underway in the framework of the Plan for the implementation of the 2008 SNA for 2011-2014	Development of methodology of formation of indicators other changes in assets, balance sheets by institutional sector <u>Activities:</u> - The study methodology of the 2008 SNA - Calculations account indicators in accordance with the methodology of the 2008 SNA	Conducted studies with methodological materials as well as the compilation of individual indicators based on available data.		- Need expert advice of international organizations - Necessary to further cooperate with the National Bank, Ministry of Finance and Ministry of Economic Development and Trade at the meetings of the Working Group	Continuously
				<u>Future events:</u> - Within implementation of KAZ-STAT project "Strengthening the National Statistical System of the Republic of Kazakhstan for the period 2012-2016" is planned to seek expert advice from Consortium.	- Necessary to further cooperate with government stakeholders at the meetings of the Working Group, as well as within implementation of KAZ-STAT project "Strengthening the National Statistical System of the Republic of Kazakhstan for the period 2012-2016"	2016-2017
