GSIM and DDI working together

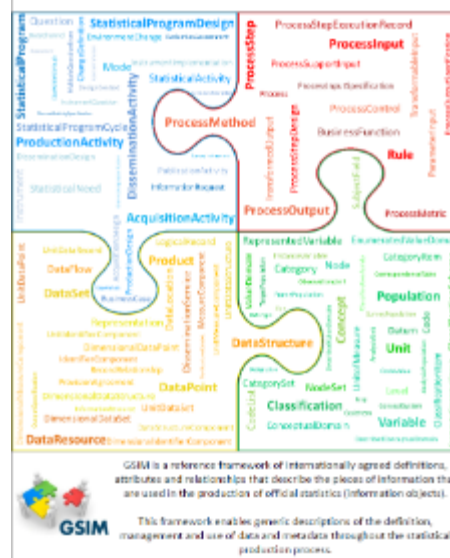

GSIM's conceptual model and DDI's model of implementation standards for CSIS

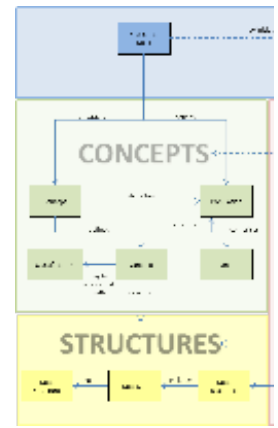

The model of implementation standards for CSIS (the DDI model) supports the conceptual model of the statistical process (the GSIM model) and provides a framework for the production of official statistics (information objects). The model of implementation standards for CSIS (the DDI model) supports the conceptual model of the statistical process (the GSIM model) and provides a framework for the production of official statistics (information objects).
