

Making Data Meaningful Part 4: A guide to improving statistical literacy

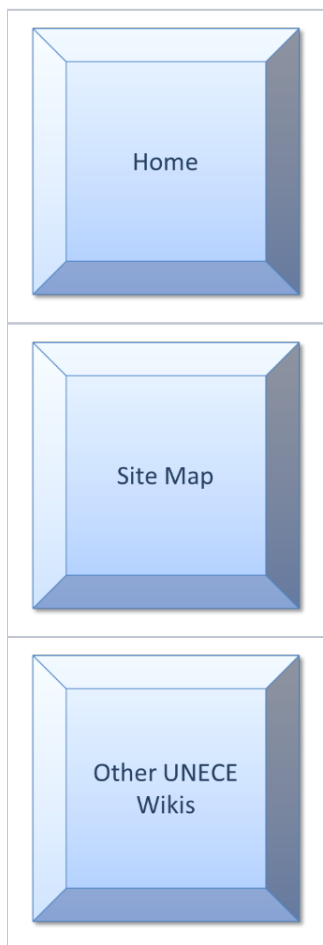

1) Basic Information

Training material title
Making Data Meaningful Part 4: A guide to improving statistical literacy
Brief description and comments
Statistical literacy is a term used to describe the ability of an individual or a group to understand and comprehend statistics. In this training we show which abilities are included in the term "statistical literacy", broadly summarized under three dimensions.
Main category
Methodology of Data Collection, Processing, Dissemination & Analysis
