3.7 Finalise production systems

This sub-process includes the activities to put the assembled and configured processes and services, including modified and newly-created services, into production ready for use. The activities include:

- Producing documentation about the process components, including technical documentation and user manuals.
- Training the users on how to operate the process.
- Moving the process components into the production environment and ensuring they work as expected in that environment (this activity may also be part of sub-process 3.5 (Test production system)).

Quality indicators:
- Percentage of materials adequately archived (e.g. easily retrievable, properly labeled, retention period indicated).

For details, see Quality Indicators for 038FM (version 2.0).
