3.3 Build or build dissemination components

This sub-process describes the activities to build new components or reuse existing components needed for the dissemination of statistical products as designed in sub-process 2.1 (Design outputs). All types of dissemination components are included, from those that produce traditional paper publications to those that provide web services, (linked) open data outputs, geospatial statistics, maps, or access to microdata.

Quality indicator:
- Extent to which relevant metadata can be linked to output data
- Extent to which user requirements are fulfilled in terms of e.g., dissemination formats, information systems, graphical supports

For details, see [Quality indicators for OBISPM (version 2.0)](#)
