Overview Updated in response to international feedback

CSPA at a glance

Detail

Contents

I. The Problem Statement Updated in response to international feedback - feedback from Pierre Peyronnel to come in response to my reply to his comments

II. Common Statistical Production Architecture Updated in response to international feedback - but please see re Arnaud Degorre second comment - I like it but couldn't find a good way to incorporate - any help please

III. Business Architecture Updated in response to international feedback - see response to Neville's comment - where no change was made

IV. Information Architecture Updated in response to international feedback - still some confirmation by Carie Jenny Linnerud, Pierre Peyronnel and Neville de Mendonca needed to finalise

V. Application Architecture Updated in response to international feedback - still some confirmation by Neville de Mendonca, Arnaud Degorre, Jakob Engdahl and Pierre Peyronnel needed to finalise. Hakim Sjöström note some comments for you on navigation. Also please review the new glossary definitions below.
VI. Technology

Architecture Updated in response to international feedback - feedback from Pierre Peyronnel are you OK with this change?

VII. Roles involved in the production of CSPA Services

VIII. Enablers

Annex 1: Templates

Annex 2: GLOSSARY NEW

- in response to international feedback - changes from original doc are:

1. The Application Architecture definition - changed to CSPA Architecture Patterns group definition as noted in that section of document

2. Terms Pierre Peyronnel noticed had no definition in Application Architect - these need to be confirmed, please edit in the Glossary

<table>
<thead>
<tr>
<th>Statistical Programme</th>
<th>A Statistical Programme is a complete implementation of the GSBPM required to deliver a statistical output. An example could be Gross Domestic Product.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Statistical Programme Cycle</td>
<td>A Statistical Programme Cycle is one specific instance of this. An example could be Gross Domestic Product 2019.</td>
</tr>
</tbody>
</table>

2.0 Annex 3: CSPA Acronyms/Abbreviations NEW - discovered this was missing as well - only change from original doc was the addition of CSDA
