Production

46. The Production activity area covers all steps necessary to design, implement and manage statistical production processes or cycles, including surveys, collections based on data from administrative or other sources and account compilations. They deliver the outputs approved under Strategy and Leadership, utilising the capabilities developed under Capability Development and the resources managed under Corporate Support.

47. The Production activities in the GAMSO are those included in the GSBPM version 5.1. This means that the GAMSO is by construction fully consistent with GSBPM.
