5.8 Finalise data files

This sub-process brings together the results of the other sub-processes in this phase in a data file (usually macro-data), which is used as the input to the "Analyse" phase. Sometimes this may be an intermediate rather than a final file, particularly for business processes where there are strong time pressures, and a requirement to produce both preliminary and final estimates.

Quality Indicator:
- Delay between expected and actual finalised data file

For details, see [Quality Indicators for GSBPM version 2.0](#)
