May 2018

Data Architecture

Progress

Hold fruitful Meeting in Belgrade:

- adopted new Capabilities coherent with StatCan ones
- discussed and decided the UseCases that will be described in current year project
- discussed “Why to use CSDA” and prepared a first text for a future brochure
- decided the contents for the Guidelines document and defined activities to write the first draft
- prepared a list of differences between New and Traditional Data Sources

Next Steps

- Survey on CSDA: every NSI list what Capabilities are available and implemented and which are needed/wanted, trying to define the gaps and a list of activities to reach the "GOOD" level
- UseCases: every NSI involved should revise/complete its UC, using the defined template: then we will derive patterns from UCs
- New draft version of Capabilities and Architecture Document
- Explicit relationships between CSDA and other architectures (Gartner, DMBOK) and other standards (GSBPM, GSIM, CSPA)
- Define Maturity Model based on Guidelines

Risks and Issues

Strategic Communication Framework

Progress

Good progress continues on all five work teams

Work is on schedule for a first draft to be completed by the end of June

Issues Management paper submitted to the CES for consideration at the June meeting - Chair of the HLG-MOS to speak to the Project’s submission

Next Steps

Progress updates provided by the work teams posted on the wiki site in real time

Next meeting of the Project members scheduled for Monday, May 28th

Face to face meeting of the Project team members scheduled for June 28th in Cork, Ireland

Risks and Issues

no risks or issues to report

News from the Groups
### Developing Organisational Resilience

**E-mail to request from the countries Target Operating Models, vision statements and modernization business cases was sent out to the countries on 14th of May with deadline of 8th of June**

**Training Framework**

No update

**Risk Management**

Revised training materials were circulated, deadline to provide comments is 1st of June. Afterwards training materials will be published on the public wiki page.

The team is also working on preparing first draft of the short paper for risk appetite, based on the existing training materials.

### Supporting Standards

**Integrated View**

Discussion among the members on future work took place. It was emphasised that an “integrated view” is an important topic and that could be implemented by making the links between models more clear (proposal was to start with GSBPM-GASMO and GSIM-GSBPM) and by linking the models to the HLG new vision. Another key word is “Consolidate and communicate” by consolidating existing materials with practical examples and communicating with more clarity the models; and by developing targeted communication material.

**GSIM Review**

- The team also has covered most issues under GSIM groups. Changes have been implemented in Enterprise Architecture file and Clickable
- Annex for LIM Variable would be completed after revision as it would need more time for development

**Other Events**

- **Architecture Sprint (29 Jan - 1 Feb)**
- **Communication Sprint (12 - 16 Feb)**
- **ModernStats World Workshop (11 - 13 Apr)**
- **Data Architecture Sprint (May)**
- **Communication Seminar at CES (19 June)**
- **DissComm Workshop (25 - 27 June)**
- **HRMT Workshop (12 14 Sept)**
