Creative Interactive Session in 2016 Workshop

The joint 2016 Data Collection and Dissemination and Communication Workshop, will have an innovative creative interactive event. Participants will work at the workshop in small teams to produce real output. Output will be judged by colleagues and experts in a creative cooking competition style setting. By combining team members with different expertise, synergy will be created. Topics and further information will be provided at a later stage.

Information Note 2, explaining the special session, is now available: http://www1.unece.org/stat/platform/x/bQkpBw
