Upcoming Workshops in September and October: Culture Evolution, Data Collection and Statistical Confidentiality

**Workshop on Culture Evolution, Geneva, 11-13 September:**

The purpose is to share knowledge and effective practices in human resources management related to the creation and maintenance of organizational culture that are 'fit for purpose'. Importantly, this includes the associated change management challenges. The target audience of the workshop is mid to senior level staff members responsible for human resources management, training, risk management and other related areas in their respective organisations. **Statistical Data Collection Workshop 'New Sources and New Technologies', Geneva on 14-16 October 2019.**

The objective of this workshop was to identify innovative ways and best practices in statistical data collection, and to provide a platform for practitioners to exchange experiences and foster collaboration in this area. In addition to the more traditional presentations, the agenda of the workshop included target-driven small group discussions to identify best practices and new opportunities. The target audience for the workshop includes senior and middle-level managers responsible for data collection activities and new data sources, across all statistical domains from Statistical Offices and other agencies from national and international statistical systems. **Work Session on Statistical Data Confidentiality 2019, hosted by Statistics Netherlands in The Hague, on 29-31 October.**

The main objectives of the meeting are to facilitate the exchange of experience and identify the best practices in dealing with technical issues related to statistical data confidentiality in statistical offices. The meeting is primarily intended for experts from national and international statistical offices as well as invited academics dealing with statistical disclosure limitation.
