Task Team on Data Transmission

Aim and scope

The task team will aim to facilitate SDG data transmission through exchanging knowledge and experiences on the application of transmission standards (such as SDMX) and transmission methods and similar tools (such as APIs) that make automatisation of data transmission possible.

The task team will focus on data transmission techniques and tools. It will take into account the context of data transmission (national reporting platforms or data flow relationships between countries and agencies i.e. the ‘nodes’ of data flow) if necessary, but will not focus on it.

**TASK TEAM OUTPUTS AND RESOURCES**

- Case Studies
- User Stories
- FAQs

**EXTERNAL RESOURCES**

- IAEG-SDG Working Group on SDMX
- SDMX-SDGs Working Group 2019 Progress and Plans for 2020
- SDMX Global Conference 2019
- SDMX implementation-status OECD countries
- SDMX IT building blocks
- Eurostat’s SDMX Converter
- ILO’s SMART tool
- Eurostat’s SDMX Reference Infrastructure
- OpenAPI Specification

**TTDT ADMIN**

- MEMBERS
- Work Plan
- Meetings

WEBEX meeting - 11 November

**HIGHLIGHTING**

Using SDMX or APIs? Share your experience by writing a case study.
