

# 2016 Experiment Proposals and Reports

A Guide to Data Integration for Official Statistics: High Level Group for the Modernisation of Official Statistics Data Integration Project

**2016 ModernStats Data Integration Project Introduction and Purpose HL G-MOS Data Integration Project WPA: a framework for Data Integration WP0 : Data sets for common approaches WP1: Integrating survey and administrative sources WP2: New data sources and traditional sources WP3: Integrating geospatial and statistical information WP4: Micro-macro integration WP5: Validating official statistics Quality Framework for Data Integration Next Steps 2016 Experiment Proposals and Reports 2016 Project Members References and further information 2016 Experiment Reports**

## 12. Annex 1: 2016 Experiment Proposals and Reports

This annex contains a summary of the original experiment proposals proposed during 2016. A number of these proposals were combined and reshaped into multi-country efforts. Some proposals are still underway. Some have been deferred due to resource constraints.

[A comparative analysis of income data from New Zealand Income Survey with administrative data \(Copy\)](#)  
[Analysis over a scheme of integration of geospatial and statistical information \(Copy\)](#)  
[A system of consultation and geographic location of schools \(Copy\)](#)  
[Conduct work in purpose to inventory the level of integration spatial objects used in statistics and geodesy - „The 10 Level Model“ for harmonization of statistical and geodesy reference framework. \(Copy\)](#)  
[Identifying and testing the tools used by partners for Data Integration \(Copy\)](#)  
[Integrated big-data price measurement: Estimation and comparison of price indexes from different big-data sources across countries. \(Copy\)](#)  
[Integrating potential information sources for the statistical data production on job vacancies \(Copy\)](#)  
[Integrating web scraped data for the compilation of price statistics \(Copy\)](#)  
[Linking the Statistical Register of Employment and the Labour Force Survey \(Copy\)](#)  
[Online and scanner data for integrated price measurement: Lodgement of scanner data and web-scraped price data to enable integrated and internationally comparable price measurement. \(Copy\)](#)  
[Web-scraping strategy case studies: Approaches to gaining web-scraped data for official statistics – case study of NZ and survey of other countries' experiences. \(Copy\)](#)
