

New information

- The Machine Learning Project report is available. (see: [ML project report](#) added on 2021-01-05)
- The [ML project report](#) includes an infographic (see: [Infographics](#))
- The executive summary on the WP1 pilot studies is available. It is intended for Heads of Statistical organisation, Chief statistician, Chief Methodologist, Chief Data Scientist, CTO/CIO and Senior leadership. (see: [WP1 Executive Summary](#) added on 2020-12-14).
- Final versions of the [WP1 theme report on Coding and classification](#), the [WP2 report on quality](#) and [WP3 on integration](#) are available. (updated on 2020-12-14)
- Discussion papers on the Coding and Classification theme report and the Edit and Imputation theme report are available. (see: [Discussion on C&C](#) and [Discussion on E&I](#) added on 2021-01-05)
- In addition to the pilot studies, other developments or uses of ML were presented to project members. They are shared to further highlight the interest in advancing the use of ML, please see [Other applications of Machine Learning](#). (added on 2020-11-27)
- Several initiatives taken by statistical offices to further facilitate and accelerate the advancement of in the use of machine learning and data science, more generally, are provided at [Initiatives to accelerate the integration of machine learning solutions](#). (added on 2020-11-27)
