Issue #41: On data integration (sub-process 5.1)

(Feedback from Statistics Canada; 27 September, 2017)

There are descriptions that need to be improved to convey data integration.

Should 5.1 be removed as a sub process and embedded throughout the model?

Text in 5.1 should be updated: can take place in any phase of the GSBPM.

Methodology is very survey oriented, need more descriptions on data integration and "methodology certification"
