Active Ageing Index

The Active Ageing Index (AAI) is a tool to measure the untapped potential of older people for active and healthy ageing across countries. It measures the level to which older people live independent lives, participate in paid employment and social activities as well as their capacity to actively age.

-> DOMAINS

Employment

INDICATORS	Employment Rate 55-59
	Employment Rate 60-64
	Employment Rate 65-69
	Employment Rate 70-74

Please note that any use of the graphical presentation of the Active Ageing Index, including the icons for the overall index and its domains, has to be accompanied by a reference to the project and URL of this page: "Active Ageing Index project. <https://statswiki.unece.org/display/AAl/Active+Ageing+Index+Home>"
