

# Question

## Definition

Object	Group	Definition	Explanatory Text	Synonyms
Question	Exchange	Describes the text used to elicit a response for the <i>Concept</i> to be measured.	<p>A <i>Question</i> may be a single question used to obtain a response, or may be a multiple question, a construct which links multiple sub-questions, each with their own response.</p> <p>A <i>Question</i> also includes a relationship to the <i>Value Domain</i> to document the associated response criteria for the question. A single response question will have one <i>Value Domain</i> associated with it, while a 'multiple question' may have more than one <i>Value Domain</i>.</p> <p>A <i>Question</i> should be designed with re-use in mind, as it can be used in multiple <i>Questionnaires</i>.</p>	Multiple Question
