

Upper and post secondary education

| Concept | Upper and post secondary education - , |
|--------------------|---|
| Definition | <p>Upper and post secondary levels correspond respectively to levels 3 and 4 of International Standard Classification of Education (ISCED) 1997 classification. Tertiary level is not included.</p> <p>Upper secondary education (level 3) typically begins at the end of full-time compulsory education for those countries that have a system of compulsory education. The entrance age to this level is typically 15 or 16 years.</p> <p>Post secondary education (level 4) captures programmes that straddle the boundary between upper secondary and post-secondary education from an international point of view. Level 4 programmes can, considering their content, not be regarded as tertiary programmes. They are often not significantly more advanced than programmes at level 3 but they serve to broaden the knowledge of participants who have already completed a programme at level 3.</p> |
